-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 04 February 2004.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 1632

**DETAILED ACTION**

1. Claims 23-41 are pending in the instant application.
2. It is noted that claims 24-26, 28-34, 36-39 and 41 have not been considered because these claims are dependent on cancelled claims.

***Election/Restrictions***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 23, 27 and 35, drawn to a recombinant pox virus expressing MUC1 fragment and uses of such as pharmaceutical composition and as vaccine, classified in class 514, subclass 44.

- II. Claim 40, drawn to a method of ex-vivo therapy using cells expressing a recombinant pox virus expressing MUC1, classified in class 424, subclass 93.1.

4. The inventions are distinct, each from the other because of the following reasons:

Inventions of the groups I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)).

In the instant case, the invention of group I is drawn to a pox virus comprising MUC1 tandem repeats and its use in vaccination and in gene therapy whereas the invention of group II is drawn to a method of ex-vivo therapy using

Art Unit: 1632

cells which are expressing a pox virus comprising MUC1 tandem repeats. The method of group I is patentably distinct from the invention of group II because the steps of practicing the method of group II are different from those of group I, for example, the method of group I is an in vivo method wherein said pox virus is administered to an animal whereas in the method of group II, the pox virus is administered to cells in vitro and said cells are administered to an animal for therapy. Likewise the mode of administration of the virus, pattern of expression, and site of action of the recombinant protein will be different for the two methods. Therefore, the analyses of the inventions of the groups I and II will require separate searches, for example in the non-patent literature .

5. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art shown by their different classification and their recognized divergent subject matter, and because each invention requires a separate, non-coextensive search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
